

HELPING CONSULTANTS

Efficiently Designing Video Wall
Projects for Professional Applications

Bringing Innovation to Video Wall and KVM Management in Control Rooms

Discover VuWall's many free services offered to AV, IT and security consultants.

We're committed to helping consultants succeed. Our dedicated team of experts provides the tools and information you need to select the right technology and ensure that every project is specified properly the first time.

HELPING CONSULTANTS

Efficiently Design Video Wall Projects for Professional Applications

VuWall offers a complete ecosystem of interoperable products built on a unique standards-based architecture delivering the most effective distribution of visual information from any source to any display across organizations. At the center of the ecosystem is the TRx Centralized Management Platform, a unified software solution for all visualization needs combining advanced video wall management & KVM operations to provide secure, scalable, and reliable control room technology.

Distribute

Stream sources from computers, remote desktops, and cameras to any multiview display.

Manage

Manage multiple sites from one centralized platform and create custom control panels.

Visualize

Efficiently aggregate content on single displays or multi-surface configurations.

Control

Easily control sources locally or remotely from customized operator workstations.

SERVICES TO CONSULTANTS

Take advantage of our services, dedicated uniquely to AV, IT, and security consultants

- ✓ Dedicated training program
- ✓ Project design support
- ✓ Access to Visio/CAD drawings
- ✓ Support for bid/tender specifications

Need help with your AV distribution or video wall project?

SOLVING INDUSTRY CHALLENGES

Video Wall Management & KVM Operations Made Simple

ONE PLATFORM. ANY SOURCE. ANY DISPLAY

Challenges

A WIDE VARIETY OF TECHNOLOGY

Handle different types of video formats, display technology, and software tools to fulfill the different visualization needs throughout an organization.

CUSTOM PROGRAMMING

Controlling different components often requires custom programming and relying on stable and well-documented API's from each vendor. This is very costly and time-consuming.

CHANGE OF SCOPE

Between the start and end of a project, requirements can change. Change orders and redesigns may demand complex adjustments.

EVOLVING TECHNOLOGY

Designing a project with the confidence that in years from now it will be possible to integrate new technology with the existing infrastructure.

Solutions

A single management platform that bridges AV, IP and IT systems, able to handle a variety of source formats (HDMI, H.264, H.265, SDVoE, Web, RSS) and a variety of display formats (LCD, LED, single monitors, video walls, architectural displays, projectors).

A single management platform with easy drag-and-drop operations and a built-in control panel designer.

A scalable solution built on a modular architecture with a drag-and-drop interface that facilitates the redesign of preset configurations that include new devices.

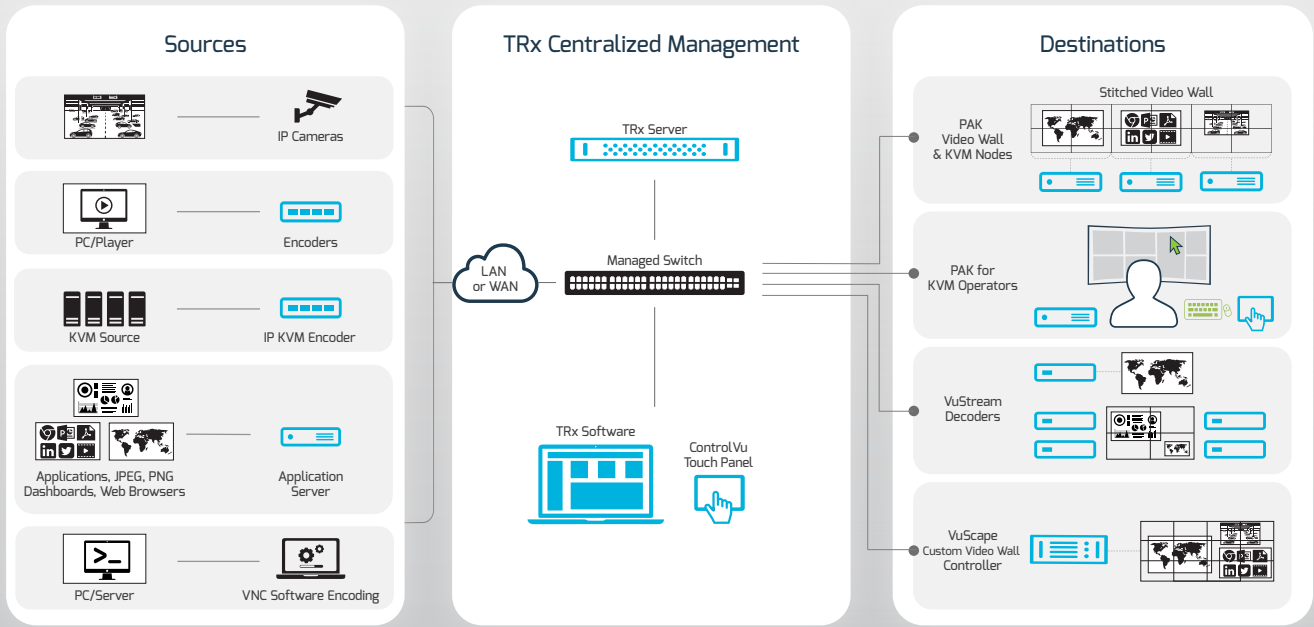

A standards-based, interoperable solution that is built on an open architecture and easily integrates with third-party components with an extensive and fully-documented API.
